Cashmere Rose

This impressive, romantic, soft pink shade provides an elegant look to everyone who wears it: it could be our outfit, shoes, accessories or our nails. It can be used perfectly as a base color to emphasize the other shades. Pair these with grey, purple or even blue colors for the fashionable autumn look.

NEW! TIGER EYE INFINITY CRYSTALAC (limited)

This product line has been waited for a long time now!

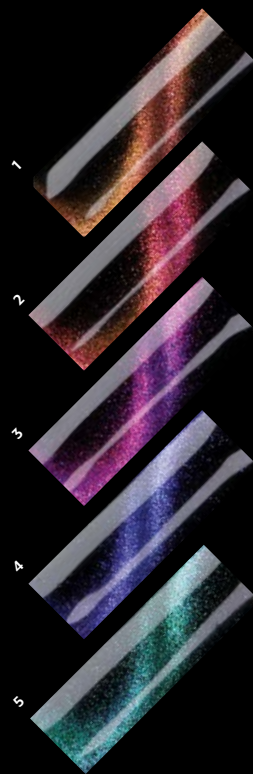

This tiger-effect not just reflects the lights, it even changes its color! Every shades change if you see it from a different angle and it reacts on the warm/cold lights as well! One shade is not just providing us only one, but three different colors to see.

It has to be used differently than the usual TigerEye products: it is recommended to use it in a black base, but it looks good in other darker shades as well: bordeaux, eggplant, darkgreen, darkblue.

NEW! MULTIFORM TIGER EYE MAGNET

This TigerEye Magnet could be used to create more and new shapes in the TigerEye universe. The strong magnet covers the whole surface of the product, and it could be use to make S, X, + shapes.

Be creative and use the different parts of the magnet. Size: 8,2 CM

This nail is made with 3512 Crystalac and the New Tiger Eye Infinity Crystalac #2, #3.
Made by Alexandra Ménéz.

NEW! COOL TOP 4 DARK

Top gel with high shine

NON-CLEANSING, SOAK-OFF TOP GEL

Our most popular top gel, Cool Top Gel, gets a new version! It doesn't contain the component what makes the nail luminescent in a blueish color because of the UV light. Use this, and you will have no problem what you had with the other Cool Top Gel when you worked with warmer shades of colors (the warmer shades were different in a natural light, than in an artificial light). From now on, the bordeaux will be not purpleish, the black stays black. Non-cleansing, elastic, soak-off gel, middle-stiffness.

Cure time:

LED: 1-2min, UV: 2-3min

STEPBYSTEP

by Roxana Sárközy-Eigner

- (1.)** I put a base level on the already prepared nail with Compact Base Gel Clear, and I apply the form like an almond shape.
- (2.)** I lengthen the nail with Babyboomer 2 White Builder Gel and I make the free margin in the way that I smoothe the material towards to the cuticle, halfway to the natural nail.
- (3.)** I make a layer with Cover Refill Hard Gel for the whole surface of the nail and I build the C-curve.
- (4.)** After the curing, I cleanse the nail with cleansing pad.
- (5.)** I cover the nail with Cool Top Gel Universal
- (6.)** The surface of the top gel, I place some Swarovski stones with silver micro beads, using Gem Glue Gel.

NEW! AQUAINK CRYSTAL DROPS colors 2019 autumn/winter

There are three new colors of Aqualnk Crystal Drops: chocolate, burgundy and black. Use their Aqualnk effect for fall or winter decorations! Their use is equivalent to the previous colors. It's recommended to use on the matted Cool Top Gel Universal giving a last finish cover with the same!

CN TIP: If you apply a 3S78 for base (fixed and matted) the Aqualnk Crystal Drops will come out with a slightly blue light making the decoration even more exciting. If you want to see the original color, use Cool Top Gel Universal on the matted finish. We don't recommend the Cool Top 4 Dark Top Light because causes fading.

4ml –

High Shine: in order to a brush doesn't leave any marks in the pattern, the top coats must be put on in a thicker layer .

Aqualnk Crystal Drops: drop on the surface any way you want.

Cool Top Gel Universal: made it matte with softbuffer in scratch free.

NEW! FUN & FORM Gel

Specifically designed for stones. Non-cleansing, colorless, soft decoration gel in a practical tube. From the tube it can be easily pressed into the silicone mold to work faster and cleaner. Its soft texture makes it easy to blend any decorative element. After printing out of the silicone mold, its surface is smooth and shiny. It's not recommended to cover it because loses its edges.

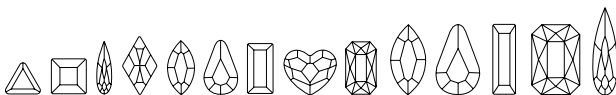

Cure time: LED: 1-2min, UV: 2-3min

NEW! FUN & FORM Silicone mold

Make unique decorations with your own stones!

The silicone mold offers the opportunity to create 11 stone forms in several sizes and shapes. Be creative and use glitter, Nailfetti, beads, colors, Camea Gel, and anything to make your own rhinestone. The best results can be achieved by using non-cleansing materials, because after removing them from the mold they give a smooth glossy surface. The best choice is Fun & Form. 5x4x0.4 cm. The depth of the included samples is 3 mm.

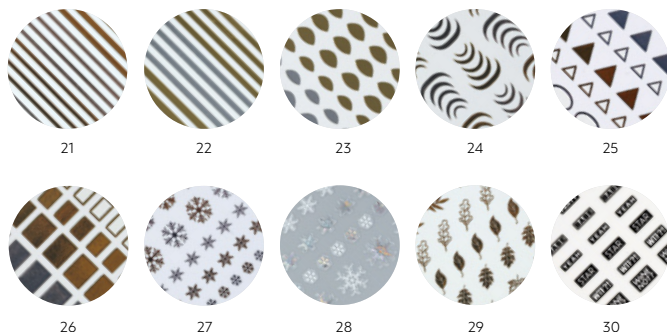

NEW!

JEWEL STICKER

A self-adhesive, easy-to-use jewel sticker that fits perfectly on the nail surface due to its thin and elastic material. Adheres the best is a glossy, dry surface: 3S CrystalLac and OS, or 1S CrystalLac without top gel. On GL CrystalLac only after fixed top gel). It is recommended to cover with top gel.

NEW! PRO FOIL

GEL CLEAR

It's a transparent film gel and due to its density it can be easily used to make more convex patterns. Because of its excellent adhesion with shorter or longer curing times it's useless to count the seconds on the lamp. When creating a pattern, there is no problem if one part of the line is convex and the other is flat. Cures equally and adheres equally. Use as pattern for Xtreme metallic foils or even for a complete surface. Because of its transparency it will not stand out anywhere on the edges or in hard-to-reach areas. If you work with non-cleansing colors, use Pro Foil Gel and make foil decoration on the nails!
