COOL REMOVE BUILDER GELS

NEW GENERATION, SOAK OFF BUILDER GEL FAMILY

NEW!

**NON-HEATING COOL
FORMULA**

**EASY TO SOAK OFF
REMOVE VERSION**

**DURABLE AND
FLEXIBLE**

NEW GENERATION BUILDER GELS! COOL REMOVE BUILDER GELS – NON-HEATING FORMULA, EASY TO SOAK OFF REMOVE VERSION, DURABLE AND FLEXIBLE

Having the same formula as Cool Gel, this is an easy to soak off version, durable and flexible builder gel. Medium density, without burning sensation (low-heat generation), easy to handle. Excellent for salon work because it gives a natural feeling for clients while having them on. Due to the flexibility they are not fragile, excellent adhesion. To soak off the whole nail - if you sculpted the nail only from these gels - takes ca. 20 minutes.

We recommend to use brushes: 6 Gel brush, Xtreme Gel brush, Nero Merlo II. brush. Use soak off shine gels on them like Easy Off Top Gel. Cure time in UV lamp 2-3 minutes. In LED 1-2 minutes. Pinch time in UV lamp 20-25 sec. in LED 10-15 sec.

SCULPTING A CLASSIC ALMOND NAIL FORM

WITH THE NEW LOW-HEATING FORMULA, EASY
TO SOAK OFF REMOVE VERSION, DURABLE AND
FLEXIBLE BUILDER GELS

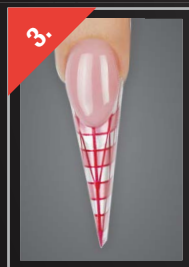

by Alexandra Mész

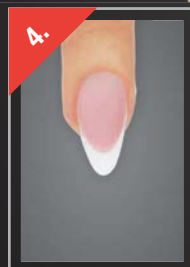

1. Apply Builder Base Gel to the prepared nail plate, then cure it for 2-3 minutes in the UV lamp. Apply the Xtreme butterfly nail form according to the classic almond shape.

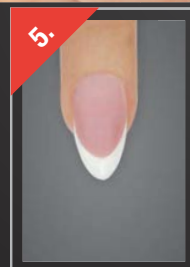

2. Create a thin base layer with the new COOL REMOVE Builder Gel Clear and Nero Merlo II. brush. Pinch the nail after 20 seconds of curing, then apply C-curve holder to the sidewall points and cure the nail in the UV lamp for 1 more minute.

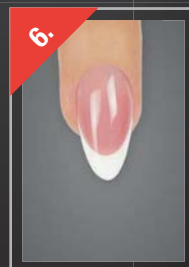

3. Create the nail bed extension with the NEW Cool Remove Builder Gel Cover Pink and Nero Merlo II. brush. Thin the material towards the cuticle area, while creating a perfect gradient. Cure it in the UV lamp for 2-3 minutes. Create the enhancement with the new COOL REMOVE Builder Gel Cover Fill. Cure it in the UV lamp for 2-3 minutes.

4. After cleansing file the smile line with 150/150 Xtreme blue and thin wooden file. Shape the nail bed part with 150/150 Professional blue (zebra) file.

5. Remove the dust thoroughly, then create the total height of the free edge part with the new Cool Remove Builder Gel White and brush 4 Gel, then cure it in the UV lamp for 3-4 minutes. Fill the possible imperfections with the new Cool Remove Builder Gel Clear.

6. Shape the nail with the 150/150 Professional blue (zebra) file, then remove the scratches with the pink core buffer. Remove the dust thoroughly, then give back the shine of the nail with Xtreme Top Shine gel, cure it in the UV lamp for 2-3 minutes.

COOL REMOVE BUILDER GELS SOAK OFF STEP BY STEP

NEW GENERATION, SOAK OFF BUILDER GEL FAMILY

SBS

**NON-HEATING COOL
FORMULA**

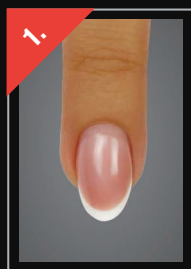

**EASY TO SOAK OFF
REMOVE VERSION**

**DURABLE AND
FLEXIBLE**

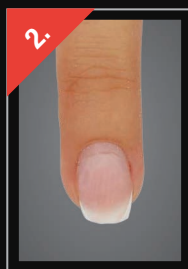

SOAK OFF THE NEW COOL REMOVE BUILDER GEL FAMILY

The soak off time - 15-20 minutes - is influenced by the thickness of the nail and the strength of the Acryl Remover. We recommend to soak off with foil because the heat that generates within the foil, speeds up the soak off time and we can scratch off the soft material. The thinner the materials, the faster it soaks off. If we don't remove it's thickness, depending on the length and thickness of the nail, the soak off time could be 30-40 minutes as well.

IMPORTANT! Apply Easy Top Off Gel on the NEW COOL REMOVER Builder Gel so it will be totally soak off.

1. Nail with 3 weeks regrowth.

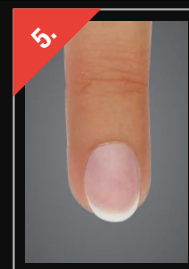

2. Shorten the nail with a clipper, then remove the half of the thickness of the nail with a nail drill or 150/150 Xtreme blue file

3. Wrap the nail with a foil thoroughly soaked with Acryl Remover. This way the soak off time will be reduced, because of the heat generation..

4. Approx. after 10 minutes, scratch the soft material, then put back the foils. After the total soak off time (15-20 minutes) scratch the soaked part with a cuticle pusher. The foils should be removed one by one, because in contact with air, it gets hard again.

5. Refine the nail surface with a pink core buffer, or prepare the nails for the newer sculpting with a 150/150 Professional blue (zebra) file.

NEW! 3 STEP CRYSTALAC TREND COLORS 2016 AUTUMN-WINTER

Extreme durability and wonderful colors in 3 steps!

Autumn is here again...With the colder season the new 3 STEP CrystaLac fashion colors are here as well. Don't be afraid of the bright and creamy colors on those rainy autumn days neither, recommend the NEW 3S43 Pink nude color for your clients. Create vivid nails on those grey and gloomy mornings: combine the New 3S45 blue with the NEW 3S44 ice coffe. Vivid but harmonious, the autumn version of the spring favorite 3S35 is the NEW 3S42 aster color. Nice winter shade is the NEW 3S46 carbonic grey which suits the other colors perfectly. The red fans will be happy to try the NEW 3S47 Fiesta red.

BASE AND TOP LAYERS:

USE AS BASE LAYER:

USE AS A TOP LAYER :

3 STEP

BASE GEL

The base gel that is flexible, soak off, provides an extreme adhesion for 3 STEP CrystalLacs. Use it in a thin layer for the perfect adhesion and better soak off effect. Cure time in UV lamp 2-3 minutes, in LED 1-2 minutes.

0.14 fl oz
0.27 fl oz
0.5 fl oz

COLOR UP! BASE GEL

„COLOR TUNING“ UNDER 3 STEP CRYSTALAC

Softer, white, flexible, strong adhesion base gel, especially under 3 STEP CrystalLac gel polish. Soaks off perfectly. Easy to handle. Use it thinly, in one layer. It easy to apply with the soft brush. If applied under the STEP CrystalLac it, gives extra vivacity to the applied colors. Total cure time in the UV lamp: 2-3 mins, LED : 1-2 mins.

0.14 fl oz
0.27 fl oz

BUILDER BASE GEL

THE STRONGEST ADHESION CN BASE GEL

Incredible strength of adhesion, new development: say goodbye to adhesion problems even in case of the most problematic clients. Easy to apply, a bit more dense, the shorter brush makes your work more even. Apply under CrystalLac, but in this case the solubility will decrease, because of the stronger adhesion. Cure time in the UV lamp: 2-3 mins In LED 1-2 mins

0.14 fl oz
0.5 fl oz

CLEAR/TOP 0 CRYSTALAC

Sealing layer for 3 STEP CrystalLacs, soak-off, flexible, durable and super shiny! They give a long lasting shine for the CrystalLacs. Apply thinly in order to reach better solubility! Cure time in UV lamp 2-3 mins, in LED 1-2 mins (depending on the lamp).

Crystal
Nails®

ONE STEP!

NO NEED FOR BASE
AND TOP LAYER

NO CLEANSING

EASIER TO SOAK OFF

ONE STEP

NEW! ONE STEP CRYSTALAC TREND COLORS 2016 AUTUMN-WINTER

Easy gel polish with vivid colors

To compensate the gloomy autumn we created below NEW ONE STEP CrystaLac colors. The creamy-pastel colors are elegant and match any kind of dress perfectly.

The not at all boring smoky grey NEW 1S35, the nuder NEW 1S36 Greek frappe can be easily combined with NEW 1S39-es dark terracotta. For the ones who are fans of moderate sparkling we recommend the NEW 1S37 Golden Sand color. The NEW 1S38 Rhubarb jam is also a sparkling color which is decent but a wonderful autumn color.

ONE STEP CRYSTALAC TOP LAYER:

Cover them with these:
(optional)

SUPER SHINE OPTIC

No cleansing, soak off super shine

No cleansing, flexible, soak off, clear shine gel with a brush. It has been developed to increase the durability and shine of the ONE STEP Crystalacs. It has optical brightening effect, so it brightens the white and light colors, and makes the darker colors more vivid. Amazing new solution to harden the natural nails in one step, without cleansing. Cure time: 2-3 mins in the UV lamp, 1-2 mins in LED.

0.14 fl oz

0.27 fl oz

0.5 fl oz

LONG-LASTING SUPERSHINE + 1
WEEK DURABILITY

ONE STEP CRYSTALAC O/CLEAR

Durable, flexible, soak off, cleansing free shine for Crystalac

You can add an even more durable cover shine on your ONE STEP Crystalacs. It will not come off or get matte. It protects the fragile natural nails like a transparent, shiny shield for 2-3 weeks. You do not even have to buff thanks to its strong adhesion ability (We recommend the Soft Touch Buffer, it will not weaken the natural nail). Cure time: 2-3 mins in the UV lamp, 1-2 mins in LED.

HOW TO BECOME - A SUCCESSFUL - “INSTA” NAIL TECH?

INSTAGRAM, YOU HAVE ALREADY HEARD ABOUT IT FOR SURE. IT CAN BE A NEW WAY TO ATTRACT MORE CLIENTS. WHY IS IT DIFFERENT FROM FACEBOOK? YOU DON'T PRESS THE LIKE BOTTON UNDER YOUR FRIENDS' PHOTOS. YOU LIKE THE PICTURES OF UNKNOWN PEOPLE, WHO YOU START TO FOLLOW ON INSTAGRAM.

WHAT?

Instagram is a social network with more than 300 million users. Here you can share photos and videos uploaded from your smart phone. 90% of the users are between 18 and 35 years, so it is the best target age group for you.

HOW?

First step: download the app! Create and edit your profile. Here you can add less info compared to Facebook, but you know, sometimes less is more! Add your and your salon's contact.

WHERE?

Get a photo about your client's nails and post it. If it is not you, but your client makes and upload this photo is also great. The best advertisement from a contented client. Ask her to always „hashtag” you!

WITH?

Hashtag means this sign # and a word directly after that without space. Add a lot for every photo. Hashtag a color #1S40 or other products #coolgel or the brand #crystal_nails_hungary or your own name and salon. In this way it will be easier to find your newest nail photos.

WHAT?

In the photo show the nails and the product. You can add something cute as an extra what attracts more „hearts”. Here you don't have „like” button, you can add a „heart” to a photo what you like. Extra advice: upload different colors and different nail shapes, so no one will think you know only one technique.

WHEN?

It doesn't matter, just post! All the pictures remain available and searchable in an easier and faster way compared to Facebook. Just scroll the page and „heart” what you like by remaining unknown. Your possible future clients can do the same on your page, who have heard from you for your regular clients.

HOW?

No problem if you are not the best photographer in the world or the light is not the best or your phone doesn't have the most modern camera. Instagram offers a lot of extras (filters and settings) in order to improve even those pictures that were made among non ideal circumstances.

WHY?

To get more clients! Good pictures attract more followers and surely there will be some who know you by the recommendation of your clients. After a few great pictures these newbies will drop you a message like „Hi! I've seen your photos on Instagram, can I book an appointment?”

FRENCH? COOL!

THE SUCCESS STORY OF FRENCH NAILS FROM THE BEGINNING UNTIL TODAY

THE REAL, CLASSIC FRENCH NAILS ARE AN EVERGREEN FAVORITE. EVERY WOMAN HAD THEM AT LEAST ONCE, WHO IS A FREQUENT VISITOR IN A NAIL SALON. THESE NAILS ARE REALLY SUIT TO EVERY DRESS, OCCASION, SEASON. BUT HOW DID IT START? WHAT DID PEOPLE USE BEFORE THE „BIG BANG“... AND WHAT DEVELOPMENT WAS MADE IN THE STORY OF BUILDER GELS?

1

ONCE UPON A TIME...

The first French nails were created without nail bed extension. make the nail bed more lively with Builder Pink I., with Xtreme Pink you can cover the smaller nail defects. In those times there was no opportunity to change the size and shape of the nail bed. The natural nail gave the curve of the smile line. So the sculpted nail's smile line had to follow it. Due to it, in case of certain nail shapes the result wasn't too elegant. For example: in case of a shorter nail bed, the white French free edge looked disproportionately too long.

2

„WHITE-EVOLUTION“

At the beginning clients preferred the more natural white. Not a long time later they changed to the super bright white free edges. It can be reached by products with higher pigmentation, such as Xtreme White and Builder White II. The former has a warmer white shade, more dense, the latter has medium density, colder shade and its special characteristic: in the UV lamp its surface gets nicely even.

3

REVOLUTION OF NAIL BED EXTENSION

The revolution of French nails was brought by the nail bed extension. Its pioneer product was the Cover Pink. It is still very popular, as its shade it perfect for almost every client's skin tone. It is still a best seller product, ideal choice for extension. This new product, the Cover Pink made it possible to create a shape and length of the nail bed, what we desire and the result could be elegant and proportionate.

4

THE „PINCH-MASTER“

You can increase the grace of the nails by the pinching technique. The Titanium gel was created for it thanks to a super-confidential ingredient. It is very easy to spread it on the surface, but it still keeps the sculpted nail shape very well. Fast and accurate work.

5

MORE DENSITY: THE ARRIAL OF THE ROCKIES

By the evolution of nail sculpting the more dense products have arrived: Rocky Cover LightGel and Rocky Cover HardGel. They turned very popular at once. The color of the Rocky Cover LightGel is in harmony with almost every skin tone. Its consistency helps you to reach a more accurate result.

6

TECHNIQUE OF THE NAIL BED ENHANCEMENT

Meanwhile the technique of the enhancement has arrived: we create first the full height of the nail bed, what makes it possible to file the smile line. In this way we will get a sharp and clear smile line, what we haven't seen before. The Builder Pink I. has received a new function: in case of nail bed enhancement it makes the nail bed more lively.

7

REFILL IN ONE STEP

In case of a nicely created French nail, the Cover Pink provides a perfect coverage, so the regrowth remains almost invisible. After 3 weeks you can make the refill and the client can wear the nails for a long time on. At this point we needed a product, what makes possible the refill at the roots in one step. This is how the Cover Refill products were born.

8

DREAM-REFILL WITH COVER REFILL PRODUCTS

With Cover Refills the refill is like a dream, as they are only half-covering. They cover the root of the nail only enough to create a perfect transition from the root until the nail bed extension, what we created earlier.

The Cover Refill has a lighter color and medium density. Not long after its premiere there was a demand for a more dense version and then arrived the Cover Refill Hard. (The two different densities made it possible to work in harmony with the seasons. In summer when the products get more soft we can use the Cover Refill Hard and in winter when the products get harder we can use the Cover Refill.)

9

„MAY I GET IT WITH COLOR FREE EDGE?“

These products can be used not only for nail bed enhancement, but for sculpting the whole nail. If the client changes her mind suddenly and she wants a colored or white free edge, there is a solution: apply the cleansing free Royal gel on the free edge, what covers perfectly already in one layer.

10

NEW: REDUCED HEAT GENERATION COOL GEL

The techniques are always improving, but the pinching remains always essential. The newest generation of clear builder gels, the COOL gel is easy to pinch, has a low heating formula, so it doesn't cause heat spike. It is non-yellowing, super strong, but you still can file it. Ideal density for salon work..

11

MORE MEMBERS IN THE COOL FAMILY...

Revolutionary, new development: the COOL REMOVE Builder Gel family. It contains the „no burning sensation“ formula and it is a soak-off REMOVE product, but it is still flexible and durable. It is available in 4 French colors: CLEAR builder gel with optical brightening. Cover Fill for nail bed enhancement and refill, to remove the regrowth in half-covering color. It is ideal to make the whole sculpting with only this product. Cover Pink has the characteristics of the popular Cover Pink builder gel in soak-off, COOL version. The White has a strong snow white color and perfect coverage. If you use only these 4 products to create the French nail, you can soak it off. (If you seal it with Easy off Top!)
