HYPERNOVA CYRSTALAC (GEL POLISH)

NEW! HYPERNOVA CRYSTALAC (GEL POLISH) – GALACTIC SPACE JOURNEY, NOT ONLY FOR SPACE PIRATES

Amazing play of colors - as you move your nails

The new Hypernova CrystaLac gel polishes arrived, and calls you for an amazing galactic journey. Very easy to use, similar to the other 3 STEP CrystaLac gel polishes. Apply Base Gel, then apply 2 layers of Hypernova CrystaLac color. (If you apply it on a black base, one layer of Hypernova color is enough, but its effect is even more intensive.) Cure it layer by layer for 2-3 mins in the UV lamp, then use Clear/Top 0 CrystaLac- or Easy Off Top Gel. In case of thin nails, after the Base gel, you can apply one or two layer(s) of Easy Off Hardener Gel.

Cure time in the UV lamp 2-3 mins, in LED 1-2 mins.

CN tip:

If you apply it on a black base, even one layer is enough for the Hypernova effect, and you will get a more intensive result.

the strongest adhesion**
CN base gel
Incredible strength of adhesion, new development: say goodbye to adhesion problems even in case of the most problematic clients. Cure time in UV lamp: 2-3 mins
in LED 1-2 mins.

O CRYSTALAC**
The soak off, flexible, durable and supershiny top of the 3STEP classic CrystaLacs. With its use the CrystaLacs get durable shine. In order to reach the perfect solubility use it thinly.
Cure time in UV lamp: 2-3 mins
in LED 1-2 mins.

CN tip:
In case of 3 step CrystaLac, do not overcure the color, so the cover can perfectly stick to it.
