2022 FALL-WINTER

# Trend colors of 2022 FALL-WINTER MEADOW VIOLET AND AMAZON SHADE NOVELTIES

R196  
Meadow violet

## MEADOW VIOLET

There are countless shades of purple, from dark aubergine to bluish purple. You can find both vivid and light shades such as violet, viola, cyclamen or lavender. This color represents femininity, grace and elegance. The purple color is special because it is a mixture of warm and cold shades, it has also warm and cold properties. It looks nice in combination with yellow.

SENS NOVELTIES!

# Make Up Top Gel

## NEW! MAKE UP TOP GEL

We created this collection in shades of natural effect makeup palettes.

The Sens Make Up Top Gels are colored top gels with stronger pigmentation than the Milky Top Gels. A milky white, a nice pink and a soft nude color are available in this product family. Its beautiful shade will complete after applying the last layer. For a natural effect apply it on a transparent base. French nails can also be thinly covered with it to achieve a natural effect. Apply over any light color to slightly modify the shade. After curing the non-fixing material is shiny, so additional layers are not needed. Dissolvable.

Curing time: 2-3 minutes in UV, 1-2 minutes in LED.

4ml –

Nude

# Golden Flake Base&Builder Gel

## NEW! SENS GOLDEN FLAKE BASE&BUILDER GEL

A special, milky shade base and builder gel with brush containing rosegold flakes, in 3 shades: white, mint, and pink. You can create a C-curve as well as a small nail extension or nail strengthening. We recommend to apply on a clear base layer, which increases the adhesion, so you can achieve even more durable wear with it. In case of filling / removing material, it is enough to file the gel to the clear base layer, then you can change the set to another colored base. Curing time in UV lamp 2-3 minutes, in LED 1-2 minutes.

10ml –

*"The builder gel texture allows a thicker construction achieving a beautiful layered effect, the rosegold flakes positioned deeper are more pale, while which are closer to the surface shine brighter."*

**Barbara Újvári, Sens Ambassador**

# Flash '3G Polish'

## NEW! SENS FLASH '3G POLISH'

*There are new shades in the Sens 3G FLASH '3G Polish' (gel polish) family for:*

3 unique colors that will shine in the fall-winter season: pinkish nude, which can be used in endless variations, and soft blue grape, which is suitable for purple-blue lovers. And finally, the most wanted star of the season, the emerald green. With Flash shades, you will definitely be in the spotlight, its crazy sparkle is like a diamond. Curing time in UV lamp 2-3 minutes, in LED 1-2 minutes.

4ml –

*"I love its sparkle! As a result of different lighting angles, they always shine differently! They have a lot of possibilities, whether we use them on the entire surface or decorate with them."*

# Xtreme Superior Builder Gel Milky Rose

## NEW! XTREME SUPERIOR BUILDER GEL MILKY ROSE

The newest member of the popular Superior product line has arrived, in a beautiful Milky Rose shade! Compared to other Superior gels, the new shade has a much softer, silkier texture to make the salon work easier. It can also be used perfectly for no-file techniques. For proper adhesion, first, apply a base gel. It is suitable for filling the full nail, while the heat generation is extremely low, so there is no burning sensation. Because of its beautiful pink color, we couldn't imagine any other packaging than the brand new, exclusive, and luxury version of the Xtreme Rosegold jar!

Bending time in UV lamp 20-25 seconds, in LED 8-10 seconds.

Complete curing in UV lamp 2-3 minutes, in LED 1-2 minutes.

5ml –

# 2 STEP SmartGummy Base&Builder Gel

## NEW! 2 STEP SMARTGUMMY BASE&BUILDER GEL

**SMART:** gets into place by itself, blends into the surface

**GUMMY:** because it is flexible, rubbery

**BASE&BUILDER:** you can use it as a base or refill the nails, create a C-curve but don not use it to build an extension on form, use instead the Compact product line or the Elastic Hardener Gel or the Sens base&builder product line for that from our builder gels with brush.

New, innovative Base Gel, characterized by extremely easy spreadability, high flexibility and strong adhesion. The creation of a smooth surface is easy to create, because this material is easily smooths out and all of the unevenness quickly disappears from the surface. It holds the C-curve well, meanwhile it does not flow easily in the nail fold, that provides a great help for those who originally likes to work with medium soft materials. It provides also a fast work flow with only a few corrective movements necessary. Its flexibility makes this material stand out among all Base Gels, making it extremely resistant, it adapts to all kinds of movements of the natural nail, so it stands the possible mechanical influences better than its counterparts. This product's adhesion is the no.1 of the Base Gels. Available in three colors: Nr0 Clear, Nr1 Baby Pink and Nr3 Milky white. Curing time in UV lamp 2-3 minutes, in LED 1-2 minutes

8ml –

# Correction Gel Clear

## NEW! CORRECTION GEL CLEAR

A thick, pudding textured material that contains silk fibers, especially for correction. It has a very special texture, which allows minor repairs, replacements, and even extensions without a form. Extremely strong, yet flexible material that is durable even on nail tips. It is available in a transparent version to correct mistakes in the easiest way. Using this material on the free edges prevents the nail from lifting. The material stays in place while moving and by pulling the silk fibers, the replacement can be created step by step, as the structure of the fibers gives extra support, which also stays in place thanks to its pudding-like texture. Just file the replacement built with this technique and if necessary, correct it with a drill also from the other side of the nail. It can also be used to repair the cracks of the nail plate.

Curing time in UV lamp 2-3 minutes, in LED 1-2 minutes

5ml –

Sűrű, pudingos állag, selyemszálakkal

*"A must have product for correction!"*

### NAIL STICKERS (LIMITED)

This year's popular nail art theme will also be with us in the fall season in form of stickers. Create a simply great design with the new patterns! The self-adhesive Captions stickers are available in bright colors this fall, but you can find also the colors of the year in them. The Golden art contains the classic autumn colors.

Captions, Golden art –

The beloved water stickers are also coming back! Cut out the pattern, soak it, and after a few seconds the sticker will peel off the back. Place the sticker on the stamping head, then put it over the surface of the nail and you're done!

Pastel visuals, Autumn harvest –

### FUSION CLIP FOR REVERSE TIP – CLEAR

A clip developed for holding the Reverse tip. It makes the nail preparation easier, since the tip does not move from the surface of the nail. Thanks to its clear material, the material cures perfectly.

### XTREME FUSION ACRYLGEL TIPS

Two new shapes have been added to the transparent, more flexible tips for Xtreme Fusion AcrylGel for the fall season. A box contains 120 tips in 12 different sizes. The Reverse Clear Universal Half Tip is a hybrid tip that you can use to extend the free edges of the nails by the already known reverse tip technique. It can be used to create any popular salon shape, such as square, narrowing square, almond, or oval and you can use a tip more than once! The tips have an ideal, natural-looking curve.

The Reverse Clear Russian Almond Tip is a popular shape but you can easily make almond and narrowing square shapes with it as well. You can use a tip more than once! The tips have an ideal, natural-looking curve.

# Problems in the salon – let's correct it!

**What do we call nail correction?** All the procedures that provide a solution to a specific problem when creating artificial nails or gel polish by applying extra steps. It's a multifaceted thing because every client comes to us with different challenges and a nail technician can never have enough tricks in her knowledge.

The most common cases in which correction must be applied: in the case of a nail falling downwards, in the case of a twisting nail or the nail runs upwards, if the corner is missing, the side is missing, or the lateral parallel has been filed under the corner point, when the nail has broken crosswise, if there is a large separation in the middle, the natural nail and the material split open in front or if the form simply requires it.

We apply corrections in an extremely diverse way during our work, and professional preparation is essential for these. On the one hand, technical knowledge is very important, so: recognizing the situation, understanding the problem, we need to know what led to its development and in which ways we can handle it. And we must be able to choose the most appropriate way from among several solutions. Of course, another very important element of the solution is a comprehensive knowledge of our materials. Fortunately, there are plenty of materials available to make corrections! It is important to know that the strongest and most durable materials are the mixtures of liquid and solid ingredients. Just think of acrylic! We have long considered it the strongest material, but we have other options beyond that.

In the case of acrylic gels – such as the Xtreme Fusion AcrylGel or the Sens AcrylGel product line – the mixture of gel and powder ensures outstanding adhesion to the material. In the case of gel polishes the Sens Base Gel has extra adhesion and this is our strongest liquid base and builder material since it contains silk fibers, the super properties resulting from the mixture of the two materials prevail here as well.

Hardener Sand can also be sprinkled or mixed into any sticky Base Gel to create a super tacky, resistant and hard material. These materials should be used during correction to solve various problems.

It is not easy to decide when to use which version, and this is exactly what led to the creation of one of our latest developments, to the Correction Gel. This material can be used specially for corrections, it is a thick, pudding-like gel which is also full of silk fibers. The combination of these two ingredients give us a universal solution for all kinds of situations! The pudding-like texture allows us to work in 3D, so we can apply it either by pulling it out into the air next to the nail, or by filling it up high on an already curved nail. The silk threads only strengthen this further, as they can be connected to each other by almost creating a net to cover a cracked natural nail, or by taking up a larger amount of material we can close the edge of the nail with an easy movement, or we can replace the unpleasantly narrowing side of a cube nail. Correction Gel offers us a solution to almost all of the problems listed above!
